Just Another Mountain

Carly Goodwin

Once again Here I go Looking up from these foothills below Wondering how I'll Ever reach the other side I could look at it Like it can't be done Tuck tail, turn and run Look that heartache Right square in the eye Cut it down to size I'm getting nowhere standing here like this So why waste time when I know it's (Chorus) Just another mountain My heart has to climb There's no way around it But I know I'll survive 'Cause it ain't no big deal This heart is gonna heal One tear at a time It's just another mountain Baby I'll be fine Ain't the first Won't be the last So why should I Overreact At the sign of One more bump in the road I could put it off But what good would that do 'Cause I know making my way over you is (Repeat Chorus) Soon I'll be standing on top Touching the sky Heading downhill And saying goodbye To just another mountain No there's no way around it But I know I'll survive 'Cause it ain't no big del This heart is gonna heal One tear at a time It's just another mountain Baby I'll be fine
