

Legion Of Doom

Carnivore

We rule the streets after dark fast silent like a shark
The 1200 I got between my knees
My hog helps me to spread the disease
People don't understand hair,

And leather but I'm telling you I couldn't be living better
I don't fear nothin' with my brothers on my side
Fuck with us and it's suicide

Live your life by your will learn to be an animal
By the light of the moon beware the legion of doom

We only ask to be left alone
Having good times getting stoned
Pulling some broad and guzzlin' buds
Riding high into the sun

To serve in heaven might suit some wall
Me and the boys would rather rule in hell
Looking for trouble I'm warning you
You'll be dealing with the casket crew
