

# Completely

Caro Emerald

I recall the days that I was single  
Used to flirt, fool around and mingle  
And you came along  
And suddenly it changed completely

Now some girls fall  
And others keep on playing  
Forget the now and keep on yesterdayin  
Now I know it's wrong  
You came along, I changed completely

Darling do you know, this guy thought I'm the show  
Each and every night before I sleep  
When I look up at the start at the galaxy near and far  
I'm always with you baby, wherever you are

I look at you and I sure see a genius  
It's kinda crazy like you don't think I mean this  
Your feel got my heart  
And I know that I changed completely

Darling do you know, this guy thought I'm the show  
Each and every night before I sleep  
When I look up at the start at the galaxy near and far  
I'm always with you baby, wherever you are

If I'm alone  
I still feel protected  
Our love, it's never misdirected  
And you came along,

I'm happy my life changed completely  
I'm talkin to you  
Your feel got my heart  
And I know that I changed completely
