

# Never Let You Down

Carolina Liar

Opened the door felt the cold rush in  
I let it go with no warning  
I felt like a ghost, I'm out of my skin again  
So self-exposed wanted you to see  
I heard your voice  
I made you cry  
I hurt you one too many times  
But I'll never... I'll never let you down

When worlds collide  
I'll stick around  
And never let you down  
All went away  
But I'm still in town  
And I'll never let you down

Not innocent I guess I let that show  
I wear those sins everybody knows  
So many times you reached out for me  
And I let you go it was easy  
I had a choice I realize  
I hurt you one too many times  
But I'll never... I'll never let you down

When worlds collide  
I'll stick around  
And never let you down  
All went away  
But I'm still in town  
And I'll never let you down

Never you let down again  
Never you let down  
I'll never let you down

When worlds collide  
I'll stick around  
And never let you down  
All went away  
But I'm still in town  
And I'll never let you down  
Never let you down  
Never let you down  
All went away  
But I'm still in town  
And I'll never let you down
