States Of Grace

Caroline Herring

Shall we walk the narrow way Crooked straight, rough places plain Raised up in the yin and yang Takes her around and back again She's got her act down A shadow of a sound Her show's on the road 'Cause she knows what she knows

Can you see her I can see her Can you see her now Amidst all her states of grace I can see her now

Tightrope across an ocean wide Can we reach the other side Where china dolls and worlds collide Where we fall and are baptized

She's got her act down A shadow of a sound And her show's on the road 'Cause she knows what she knows That she knows

Can you see her I can see her Can you see her now Amidst all her states of grace I can see her now

She's got a slight frame For such a heavy burden She's on the highway of her Lord

Can you see her I can see her Can you see her now Amidst all her states of grace I can see her now
