

# Georgia

Carolyn Dawn Johnson

If I'm not over you by the time I get to Georgia  
Then I guess I'll be Alabama bound  
There was a time when I'd do anything for you  
But this time, baby, I won't turn around, yeah

I always wanted to get married  
And I thought you were the one  
But you never ever asked me  
And I was tired of hangin' on

You know a girl can only be let down  
So many times before she runs  
And now this little bitty town's  
Only got room for one of us, yeah

You always said I'd never leave  
And if I did I wouldn't go far  
So I know how I must look  
With my tank 'a gas and beat up heart

Well baby I'm gone for good  
You can count on that  
Yeah, I'm gonna keep headin' west  
Till I'm too far gone to come back, yeah

And if I'm not over you by the time I get to Georgia  
Then I guess I'll be Alabama bound  
There was a time when I'd do anything for you  
But this time, baby, I won't turn around

I only got ten miles to go  
Before I cross the state line  
I can feel my hands shakin'  
'Cause they usually turn the wheel around about this time

I heard that same ol' voice inside  
I had to drown it out  
So I found me a radio station playin' something fast  
And I turned it up real loud

And if I'm not over you by the time I get to Georgia  
Then I guess I'll be Alabama bound  
There was a time when I'd do anything for you  
But this time, baby, I won't turn around

There was a time when  
I'd do anything for you  
But this time, baby oh I won't turn around, yeah  
No, I won't turn around

If I'm not over you By Georgia  
Then I'll head to Alabama  
Roll on to Mississippi or maybe Louisiana  
I'll drive all the way to California

Oh, I won't turn around  
No, I won't turn around

No, I won't turn around  
No, I won't turn around

Turn around, turn around  
I won't, I won't turn around  
I won't, I won't turn around  
No, I won't turn around

I won't, I won't turn around  
I won't turn around  
I won't, I won't turn around  
I won't turn around  
I won't, I won't turn around  
I won't turn around
