

Light

Carousel Kings

Come one, come all
This is a party song
So get loose, no excuses
Let's see you move
I don't care what you look like
It doesn't matter
You're a ghost to me

Set your mind free, feel your soul
Let emotion take control

I wish I could fly away
Break away from these empty days
If feels like nothing can phase me
But maybe I'm just crazy
If I could just find a way
To snap out of this empty daze
I won't stay, you can't make me
I'll go wherever life takes me

Get up, get up and let's go!

So roll out, roll up
And raise your glasses high
Get out, stay out
Until the morning light
We can never let up now
Not until we get this story out

Set your mind free, feel your soul
Let emotion take control

I wish I could fly away
Break away from these empty days
If feels like nothing can phase me
But maybe I'm just crazy
If I could just find a way
To snap out of this empty daze
I won't stay, you can't make me
I'll go wherever life takes me

'Cause we'll die trying to find the light in the darkness
This fortress will not fall
We won't grow tired
We'll fuel this fire with the shadows
The nightmares that we run from

On and on and on
On and on and on
I will fight every night for my burning light
For the rest of my life
Keep it shining bright
