

Last Song

Carpark North

A car
Parked under stars
No one around except for one

There she is
Holding a gun
Alone and on the run

Shaking her head
She tries to forget
All of the reasons why she left

Let go of all regrets
And just...

... Hold On
Till the very last song
Stay Strong
'Till the very last song's gone

A light
Cuts through the night
And she is blinded by the rays

At last
She can see past
The shadows in her way

I know you'll see the day
So just...

All this time
She was lost
Couldn't find her way

Her muscles hurt
From this cross
She carried everyday
