

## See Me Now

Cartel

And it's the same foregone conclusion  
All the things hurt when I was young  
It's the sample of delusion  
Spit from everybody's tongue

And I don't know how to be another  
Don't know how to be the one  
Oh I have only just discovered who I am and where I'm coming from

If you could see me now  
There'd be no purpose left to try and figure out  
If you could see me now  
You would be the last one in or out

And we can talk about solutions  
Till we're red (or blue) in the face  
And we can stare at our illusions  
And just smile till the mirror breaks

And I don't know how to be another  
Don't know how to be the one  
Oh I have only just discovered who I am and what I have become

If you could see me now  
There'd be no purpose left to try and figure out  
If you could see me now  
You would be the last one in or out

There's no accounting the days when you uncover what I see  
And are you going away is where it's all in your mistake

If you could see me now  
There'd be no purpose left to try and figure out  
If you could see me now  
You would be the last one in or out

If you could see me now  
There'd be no purpose left to try and figure out  
If you could see me now  
You would be the last one in or out

If you could see me now  
There'd be no purpose left to try and figure out  
If you could see me now  
You would be the last one in or out
