

Lost Days

Casey Donahew Band

Well its been a long time since I seen you around
and when was the last time you laid a foot in my town
my doors still open and you know the way to my place
and I still spend all night long dreamin about your face

I roll out of bed with you in my head
and I spend my time thinkin about what you said
wish I knew what I put you through
well I'd love to see you if you wanted to too
but if you don't call it will be ok
cause I've got a heartache to get me through the lost days

my friends have saw you when you were walkin down main
you been in town three days haven't called I'm goin insane
but I still remember we'd get high and love all night
but I still wake up alone till the dawning of the light

And everything I do just seems so wrong
and you been gone now for so long
and everyone around here thinks we're done
but I still feel the pain with the rising of the sun
