

Shit Storm

Casey Jones

In another place
In another dying time
Dying
Dying all alone
I am the voice inside your head
Taking lives again
On another fucked up mission
Who will survive
Survive this massacre?
There's no way out
There is no way out from here
There's no other place
There's no other time dying
Dying
Dying lonesome
I am the voice inside your head
Letting you know
Letting you know that you want
What you want
What you want dead
Saying what to do against your will
Against your way
You can't escape
There's no way out
There is no way out from here
