

# Dynamite

Cash Cash

I never knew myself enough  
And let it get the best of me  
22 years late but now on time  
I won my war and now I'm fine  
You're still here but barely whole  
You never seem to take control  
You're truckin' through the years alone  
Just to find me waiting here still by your side

Light me up like dynamite, don't need a hit when I'm with you  
Fall into my bed, don't fight a little love to get you through

Always knew you'd stay the same  
But I'll tell it straight, I'm done today  
Cuz I missed it once, can't miss it twice  
I'm not giving up this chance, this one last dance

Light me up like dynamite, don't need hit when I'm with you  
Fall into my bed, don't fight a little love to get you through  
Light me up like dynamite, don't need a hit when I'm with you  
Catch a breath for the last goodbye  
We're setting off with something new  
(we're setting off to something new)

Look and you'll find something simple deep inside  
But you never take the time, let it breathe, give it time

You don't need the rush to ease the pain  
Just take the cards and play your game

Light me up like dynamite, don't need hit when I'm with you  
Fall into my bed, don't fight a little love to get you through  
Light me up like dynamite, don't need a hit when I'm with you  
Catch a breath for the last goodbye  
We're setting off with something new  
(we're setting off to something new)
