

Dance Of The Stars

Cast

We rarely recognise the source
We barely touch upon the shores
Though blinded by it's force

And who's to say what's in between?
Can we ascend to where we've been?
Respond to what we've seen

Are we in touch with things afar?
Are we to be all that we are?
We dance amongst the stars

You better make your move
You make your move to where you are
Your so far far away
Out of touch with who you are

We look to see the moment pass
The instant falls within our grasp
We long to make it last

And whos to say how we define?
If we're to draw a constant line
A cicrle turns in time

You better make your move
You make the move to where you are
And your so far away
You out of touch with who you are

Why don't you reach where you are?
Why don't you shine like a star?

Altogether, altogether, altogether

We seldom seize upon the chance
We only glimpse it at a glance
When shaken from our trance

Fine line divides between the two
For here stands I and there stands you
Connected by one truth

You gotta make your move
You make the move to where you are
And you're so far away
Out of touch with who you are

Why don't you reach where you are?
Why don't you shine like a star?
