

## Dreamer

### Cast

I've been making my own time But I've got to keep picking up ground  
Took time but I realised There is a force that's keeping me down

Dreamer with the dream dreams on And the laughter and the song  
plays on Play on forever

I've been making my own way Through faceless people in crowds  
Don't hear what they say But the thoughts are keeping me down  
Don't you want to be found? Well you want to start picking up pieces  
The future calls but I've yet to meet it Till I leave it all, left behind

Dreamer with the dream dreams on And the laughter and the song  
plays on Till the darkness of the night is gone Till the morning  
brings the light shine on Shine on forever

Bring me out in open fields Set beside the sea They promise me  
a better life Safe in Galilee When you get that open space Earth  
beneath your feet What you find is close at hand Safe within  
your reach

I've been treading my own path Obstacles I've left behind I was  
blind to the rhythm of this life But now I'm looking through clear  
eyes Don't you want to have clear sight Well you better start  
making your own way

Darkness of the night is gone Till the morning brings the light  
shine on And the dreamer with the dream dreams on Let the laughter  
and the song play on Play on forever Feel the love
