## **Guiding Star**

Get up, get up, get up, get up Here comes my guiding star To take me home I've travelled lands afar We blindly roam

We spread our wings In search of truth And all it brings We got a glimpse of a forgotten dream And we want it to pass to you

Get up, get up, get up, get up

Ten thousand years apart And still remain You carve into my heart A sacred name

We spread our wings In search of truth And all it brings We got a glimpse of a forgotten dream And we want it to pass to you

Get up, get up, get up, get up

We got a glimpse of a forgotten dream We got a glimpse of a forgotten dream We got a glimpse of a forgotten dream And we want it to pass to you

Here comes my guiding star To take me home I've travelled lands afar We blindly roam

We spread our wings In search of truth And all it brings We got a glimpse of a forgotten dream And we want it to pass to you

Get up, get up, get up, get up
