As You Do

Castanets

I need you to love me As you do I wish you to love me As you did

And I can't ask you To take me and be true But I can ask you To love me as you do

But I can't pull you out of this Can't love, love reward us?

I need you to love me As you do But I wish you to love me As you did

And I can't ask you To take me and be true But I can ask you To love me as you do

A trip out of town As the moon goes down And the faster we move The faster we're found

And the closer we get The brighter it sets The lower it gets
