Catatonia

Fuel

Go tell the captain There's no waters left To navigate I sailed them all for you Go tell the engine room Stop stoking up the fire We're out of fuel

Doom looms large on my horizon Mountain toxic, river poison Fools get votes in a democracy

We'll build new ring roads To go nowhere in particular Now you've passed your Highway Code And make new inroads Into plundering the Earth For some more fuel

Doom looms large on my horizon Mountain toxic, river poison Fools get votes in a democracy

Go ask the Government You voted in on trust Where is our fuel?

Doom looms large on my horizon Mountain toxic, river poison Fools get votes in a democracy

Doom looms large on my horizon Mountain toxic, river poison Fools get votes in a democracy
