## **Carnival Bizarre**

Ride with me on a shooting star Through galaxies of death we chase Skeletal king of paradise Cosmic crown is the jewel you wear

Carnival bizarre Freaks and lepers step right up Circus of macabre All the devils are rockin' hard

Silver mountain of razor blades The masses ascend to a golden lie Evil angels in bloody lakes Await to celebrate their fate

Carnival bizarre Freaks and lepers step right up Circus of macabre All the devils are rocking hard

Metamorphisised From the ghost machine we fly Through circles of gold To our celestial throne Galaxies have died Dragons breath has frozen Chaos in serpent forms Manifest the universe

Crystal phoenix of midnight sky Carry the burning souls away Legions of frost we leave behind Celestial gardens of love we share

Carnival bizarre Freaks and lepers step right up Circus of macabre All the devils are rockin' hard

II Freak out of the mellow man

Cosmic psychonaut Earth into skies last port Space turning over now We elevate our thoughts Wilderness as we abort, oh yeah!!!
