

Tumbledown

Catherine Wheel

Shout just to make it clear
So loud so as you don't hear
That I made no sound
The second time around
The first time around

So smooth just to show you care
You built a new mountain there
That I tumble down
The very first time around
The very first time around
The very first time around

I let you sink
How high life could do
But you dropped me down
The very first time around
The very first time around
The very first time around

(are you in love with someone else)
(let me tumble down)
