

## Apex Predator

## Cavalera Conspiracy

You can be seen the predator's delight  
Enjoy the fear in your prey's eyes  
Settling to unleash your savage might  
As the helpless before you lies

No chance is there for captivity nor fight  
For mercy with your heart has no ties  
No particular target to apply it  
It works either each way you denied it

Only one response to the carnivore  
On wings feathered with holy terror  
Down the throat, the only action  
Momentary lapse of perception
