

## Fight This War

Cavo

The feeling cold night  
Healing the whole night  
Waiting for the end to feel the light  
[?] burnout praying to come down  
No one needs to feel alone tonight

You fight this war to heal to bones  
And I'll fight this war to bring you home  
When we couldn't find the words to say  
Nothing seems to go your way  
You don't need to face this all alone  
I'll fight this war to bring you home  
To bring you home  
[?] burned out

The stains we leave our shadows on the ground  
Voices so loud  
The TV turned down  
Words we need just changing of the sound

You fight this war to heal to bones  
And I'll fight this war to bring you home  
When we couldn't find the words to say  
Nothing seems to go your way  
You don't need to face this all alone  
I'll fight this war to bring you home  
To bring you home

Show me there's a life worth saving  
Cause something in my mind's not changing  
Maybe there's a love to save a soul  
Show me there's a life worth saving  
Cause something in my mind's not changing  
Maybe there's a love to save a soul  
We couldn't find the words to say  
Nothing seems to go your way  
You don't need to face this all alone  
You never planned to leave this world  
You fight this war to heal to bones  
I'll fight this war to bring you home  
To bring you home
