

Straight to the Bottom

Cavo

When you're trying hard to end up leaving
When you try to stay but to end up leaving
When you start too far away you reach the ceiling
And you hold the dreams that no one else believes in

When the light is high the feelings fade out
You shine so bright but you always burn out
You've lost your way you need to find your way out
When the home you build feels like a cold house
Love is violent love is strong
Love is been here all along
Love is made from the moments we take for the moment

Oh oh we won't let go
Lines been drawn floors been torn
We fall straight to the bottom
Oh oh we won't let go
Lines been drawn floors been torn
We fall straight to the bottom
Just take another one down and another down
And another down
Just take another one down and another down
And another down

When the light is high the feelings fade out
You shine so bright but you always burn out
You've lost your way you need to find your way out
When the home you build feels like a cold house
Love is violent love is strong
Love is been here all along
Love is made from the moments we take for the moment

Oh oh we won't let go
Lines been drawn floors been torn
We fall straight to the bottom
Oh oh we won't let go
Lines been drawn floors been torn
We fall straight to the bottom
We fall straight to the bottom
We fall straight to the bottom
Just take another one down and another down
And another down
Just take another one down and another down
And another down
