Celldweller

What is this place?

I am not sure

I am accessing a full topographaic map of "Atiria", and this location is not registered

I'd love to explore, but our cells need recharging

We need to get back to the ship.

Look at this wasteland, where humanity once lived and loved...
Your models have been programed within approximation of human love,
mine were not.
Therefore, I do not understand.

That is... unfortunate.

(Welcome to the Deltar city limits.)
