

## Enviovore

## Cephalic Carnage

On a distant planet  
A place devoid of life  
Before that un fateful day  
Enviovore arrived  
On that distant planet  
Revolving around the sun  
Little did it know  
Here demise was sure to comeer dries up  
Legs develop  
Lungs adapt to air  
Now fast forward  
To the future  
Millions of years ahead  
Enviovore grows, regurgitates  
Assumes human shape, overpopulates.  
Polluting land, water & the sky  
The gift of death is what they prayed  
Hiding from the sun's ultraviolet rays.  
Floating to the sky  
As they leave this place  
Enviovore grows  
Seeds the human race.  
Infest the earth  
Bring forth extinction  
Proof of life proves fatal
