

# Ontogeny Of Behavior

## Cephalic Carnage

Millions of years after Enviovore left its' dormant, decaying planet behind  
Finding a home on the planet earth  
Will the earth be consumed as well?  
Will this planet succumb as others have?  
In 10,500 B.C. we stopped breathing in the ancient way  
We started breathing in the way that we do now  
There are 2 things that you do when you breathe  
Air and pr ana  
Pr ana is a life force energy  
At this time we stopped taking the Pr ana in with our minds, by passing the  
pineal gland  
The pineal gland is like a 3rd eye  
Not the pituitary gland  
It is shaped like an eye, visica piscis  
All other existence breathes through the penal gland  
As a result we are a disharmonic level of consciousness with enough time we  
will destroy ourselves and our environment  
Planet earth will not allow it  
Sending out frequencies to every living species  
The human is earth's enemy  
It must rid us to survive  
Falling from grace, we can't escape our perilous fate  
It is too late  
Missing the signs, we are divine  
We terminate all we create  
It started with the birds and trees  
Distractions we could not see  
Naive to this reality  
Nature emits deadly frequencies with no penal gland  
Falling prey to the land  
How can we understand what's going on?  
The sky is black  
The sun won't shine  
Rabies in the air  
We're too naive to even care  
When dogs attack, the force is strong  
The things we lack  
We should have known that someday the earth will reclaim her home  
We're the parasites destroying life  
The end is near, attacks increase  
Exhuming fear, clouds of insect tribes avenge  
The polluted sky  
Man and nature are at war  
Every element her ally  
Germ warfare systematically advances  
Into our lungs  
Eradicates our chances  
Catastrophic weather  
Un-rested seas, our future in toil  
How can this be?  
Hunted by nature's beasts  
A reversal in irony,  
Haunted by our sordid  
Nature has condemned us all  
Judgment has been passed  
Exiled from our birth rite place  
Were now extinct, new life will breed,

Victims of selfish greed  
Can't escape, the wrath of the earth  
Frost and magma, destroy the human curse  
Reduced to ash, to be erased  
Fossils are what will remain,  
The human race will be no more  
The demise of the Enviovore  
Ontogeny of behavior  
Ascend to the 4th dimension!
