Blood Machine

Chad VanGaalen

They had cities built there
Buried deep underground
People had their hearts plugged in
To a giant machine that can circulate blood
Please, please, please
That's all they can say is
Please, please, please

Help us escape
From the blood machine

One of them explained to me
How they used to be free
Before the machines got built
And before there were laws regulating free will

Please, please, please
That's all they can say is
Please, please, please

Help us escape
From the blood machine

'Cause if one of us unplugs, everybody does
You gotta switch the thing off from the inside
They'll kill us all

They had cities built there
Buried deep underground
People had their hearts plugged in
To a giant machine that can circulate blood
Please, please, please
That's all they can say is
Please, please, please

Help us escape
From the blood machine
