

## Peace On The Rise

Chad VanGalen

We can sit around this fire  
And let our spirits ride on out  
Watch it as a flame gets higher  
I can see it in your eyes  
Whispers on the rise

Slip into the same old dream every night  
Welcome all the things that could've been  
I cannot afford this fight with my wit  
Interstellar space got broken in

Remember how we'd sleep so still  
Trees were singing love songs  
Drowning in the maze of a summer  
I can see it in your eyes  
Whispers on the rise

Slip into the same old dream every night  
Welcome all the things that could've been  
I cannot afford this fight with my wit  
Interstellar space got broken in

We can sit around this fire  
And let our spirits ride on out  
Watch it as a flame gets higher  
I can see it in your eyes  
Whispers on the rise

Slip into the same old dream every night  
Welcome all the things that could've been  
I cannot afford this fight with my wit  
Interstellar space got broken in
