

I Can Feel You Drifting

Chalee Tennison

You took me out so far that i can't swim to shore
I've been holding on but you're not anymore
Our love would always lead us home
Constant as the northern star
Here's a storm we won't get through cause it's not in your heart

I can feel you drifting slowly out of reach
Out there in the distance, there's something else you need
If i could be what's missing, that's all i'd want to be
I can feel you drifting

In the silence that's become the company we keep
I've realized how far we are from what we used to be
Part of you has gone somewhere i can't seem to touch
I could stay and take what's left, but baby, that's not us

I can feel you drifting slowly out of reach
Out there in the distance, there's something else you need
If i could be what's missing, that's all i'd want to be
I can feel you drifting

If i could be what's missing, that's all i'd want to be
I can feel you drifting
You're out of reach
