## I Can Feel You Drifting

**Chalee Tennison** 

You took me out so far that i can't swim to shore I've been holding on but you're not anymore Our love would always lead us home Constant as the northern star Here's a storm we won't get through cause it's not in your hear t

I can feel you drifting slowly out of reach Out there in the distance, there's something else you need If i could be what's missing, that's all i'd want to be I can feel you drifting

In the silence that's become the company we keep I've realized how far we are from what we used to be Part of you has gone somewhere i can't seem to touch I could stay and take what's left, but baby, that's not us

I can feel you drifting slowly out of reach Out there in the distance, there's something else you need If i could be what's missing, that's all i'd want to be I can feel you drifting

If i could be what's missing, that's all i'd want to be I can feel you drifting You're out of reach
