

Under Your Skin

Chalee Tennison

I watch in adoration
Every little thing you do
The way your smile lights up the room
The easy way you move
And then you take my hand in yours
And then you pull me near
And in that crystal moment
My life is so clear

I want to feel everything you feel
I want to touch everything you touch
I want to be everywhere you are
I want to love everything you love
I want to breathe every breath you take
Be a part of every move you make
Closer to your heart than anybody's been
Under your skin

I'm without hesitation
I give myself to you
Wrapped up in this emotion
So deep and so true

I want to feel everything you feel
I want to touch everything you touch
I want to be everywhere you are
I want to love everything you love
I want to breathe every breath you take
Be a part of every move you make
Closer to your heart than anybody's been
Under your skin
