

Country Music

Charley Pride

Sometimes I feel like there's just no way
To face another one night stand with a big smile while I play
To sing those happy songs I sing as we travel place to place
But don't it seem like country music puts a big smile on your face

Don't it seem like country music puts a big smile on your face
Don't it seem like all your troubles kinda wonder out in space
Don't it seem like folks around you are tappin' toes in time
And if you came in feelin' lowdown low you're leavin' feelin' fine

And when the storm cloud gathers dark and grey
Kinda catch myself a wishin' that the world would go away
Then the radio sings out a song and my heart just starts to race
Cause don't it seem like country music puts a big smile on your face

Don't it seem like country music puts a big smile on your face
Don't it seem like all your troubles kinda wonder out in space
Don't it seem like folks around you are tappin' toes in time
And if you came in feelin' lowdown low you're leavin' feelin' fine

Don't it seem like country music puts a big smile on your face
Don't it seem like all your troubles kinda wonder out in space
Don't it seem like folks around you are tappin' toes in time
And if you came in feelin' lowdown low you're leavin' feelin' fine
