

## I Live You

**Charley Pride**

I don't just love you I live you where I'm concerned nothing comes before you

If I had ten lifetimes every one I'd give you

No I don't just love you no I don't just love you I live you

Every moment with you makes a memory

When I stumble you're the reason I don't fall

My life is what you make it and you make it beautiful

Words can describe you but love said it all

Cause I don't just love you...
