

# Sweet Little Country Girl

Charlie Daniels

Well I've got me a sweet little country girl  
She's across between a diamond and a pearl  
There ain't nobody like my sweet little country girl

She's a little bitty booger she just stands about five feet tall  
She hails from Dixie and she talks with a southern drawl  
I just love to hear her when she says good morning y'all

Sweet little country girl the apple of my eye  
Sweet little country girl I'll love her till the day I die  
She's got country in her soul but she loves to rock and roll  
Well she's sure double tough and I can't get enough  
Of my sweet little country girl

Now don't think she's slow cause she lives out on the rural route  
She's a hip little lady and she knows what it's all about  
And if there's somethin' happenin' she don't mind checking it out

Sweet little country girl the apple of my eye...  
Sweet little country girl the apple of my eye...
