

Everytime You Touch Me I Get High

Charlie Rich

Every time you touch me I get high
And every time you're near me I can fly
High above the clouds and rain
Way above the hurt and pain
and when you're gone I fall down from the sky
But every time you touch me I get high

I've been kissed by the angels
And I've been loved hard by quite a few
But after you I forget the rest
Cause every time you touch me I get high
And every time you're near me I can fly
When your fingers touch my skin
That's when I start to live again
Cause without your love
I'd lay right down and die
Every time you touch me I feel high
