

When We Were Lions

Charlie Simpson

Light up on another one
Raise my bet
Coz all I see is you trying your best to lose
Pull me out from underneath
You had my love since we were kids
I follow you until the dark
I follow you to the edge of the Earth

The process is through us all
Your saving love is enough
But it can't save me now
Yeah I'm lucky holding on
Do you remember when we were like lions
Do you remember when we had it all to live for

Pour myself until the light
See your face smiling one last time
Before I have to disappear
I lost your hand in a flock
I walked for miles looking for you
I dreamed about you coming back
I dreamed that you never left

The process is through us all
Your saving love is enough
But it can't save me now
Yeah I'm lucky holding on
Do you remember when we were like lions
Do you remember when we had it all to live for

I don't think I can wait any longer
Coz now I know how emptyness feels, how it feels
Do you remember when we were like lions
Do you remember when we had it all
Do you remember when we were like lions
Do you remember when we had it all
