

# I Still Have You

Charlie Wilson

What good is a million dollars and a home  
Without someone to share and give  
What good is a bed if you're sleeping all alone  
I'm so happy 'cause with you I'm never lonely

Even if it stops snowing in winter  
Never see another white christmas  
We would go through it together  
Baby you can count on that

If all the stars started hiding  
And we couldn't make a wish again  
Even if the sun stopped shining  
I wouldn't care because

I still have you baby  
And you have me too baby  
I still have you babe  
And you have me too ye  
I'll be okay as long as I still have you

What good is a fancy car with nowhere to go  
You're just driving down an empty road  
One thing for sure is my arms was made to hold  
And these lips were made for you, so baby kiss me yes

Even if it stops snowing in winter  
Never see another white christmas  
We would go through it together  
Baby you can count on that

If all the stars started hiding  
And we couldn't make a wish again  
Even if the sun stopped shining  
I wouldn't care because

I still have you baby  
And you have me too baby  
I still have you babe  
And you have me too ye  
I'll be okay as long as I still have you

Things may come and things may go  
But I still have your, (lalalalalalalalala love)  
Seasons change I lose some friends  
But I still have your, (lalalalalalalalala love)  
When my world is upside down  
I still have your, (lalalalalalalalala love)  
Said I still have you  
And you got me too

Even if it stops snowing in winter  
Never see another white christmas  
We would go through it together  
Baby you can count on that

If all the stars started hiding

And we couldn't make a wish again  
Even if the sun stop shining  
You know I wouldn't care because

I still have you baby  
And you have me too baby  
I still have you baby  
And you have me too ye  
I'll be okay as long as I still have you
