

Hold Your Breath

Chase Atlantic

Hold your breath, we'll be just fine
A few more drinks, then we'll leave girl
And our two worlds, they will collide
But that's fine with me girl

And we're almost on, tonight
Hold your breath, we'll be just fine

So tear it down like you have too
The smokes building in my lungs
Well, God damn, I've gotta have you
And I'm not stopping till we're done here
Cause I want this more than you think, dear
And this substance isn't making my head clear
And just hold your breath, now

Hold your breath, I'll give you time
With the lights down low and the tension high
And just for the night, you'll be on mine now
And that's fine with me girl

And we're almost on, tonight
Hold your breath, we'll be just fine

So tear it down like you have too
The smokes building in my lungs
Well, God damn, I've gotta have you
And I'm not stopping till we're done here
Cause I want this more than you think, dear
And this substance isn't making my head clear
And just hold your breath, now

And we're almost on, tonight
Hold your breath, we'll be just fine
