## Interlude

La ah ah.. La ah ah..

There's still much to be done But look how far we've come

There's still much to be done But look how far we've come

There's still much to be done But look how far we've come

There's still much to be done But look how far we've come

There's still much to be done But look how far we've come

There's still much to be done But look how far we've come

There's still much to be done But look how far we've come

There's still much to be done But look how far we've come

There's still much to be done But look how far we've come

There's still much to be done But look how far we've come

There's still much to be done But look how far we've come

There's still much to be done But look how far we've come
