## **Never Change**

If you hear this wherever you are Just know I need you here I need you near me now You were brighter than the pale white moon Reflected in your eyes So I guess it's no surprise I can't forget you No matter what I do

I will always carry you in my heart You'll always be my shooting star Autumn days will fade away But memories will always stay the same I'm hoping you will never change Don't ever change

I just need to slow down for a while I'm missing your warm smile And the way you used to say "Stay with me till the daylight breaks No matter what it takes Just say you'll stay"

I will always carry you in my heart You'll always be my shooting star Autumn days will fade away But memories will always stay the same I'm hoping you will never change Don't ever change
