

## Run & Hide

### Chasing Safety

I tried to run I tried to hide  
I've been dealt this hand despite all the things that I've done  
I tried to run and hide. I stayed up all night  
I've been dealt this hand despite all the things that I've done

Been left alone nowhere to go  
My eyes are swollen shut and I'm left here in this god damn rut  
I see black and white no sign of light  
Why hold my head up high to have it ripped right off my fucking shoulders

I tried to run I tried to hide  
I've been dealt this hand despite all the things that I've done  
I tried to run and hide I stayed up all night  
I've been dealt this hand despite all the things that I've done

Right from the start born with no heart  
You see the rest of the world in a different way  
No good just evil  
I stood up straight buried the hate  
Look in my eyes I want to end your life

I tried to run I tried to hide  
I've been dealt this hand despite all the things that I've done  
I tried to run and hide I stayed up all night  
I've been dealt this hand despite all the things that I've done  
Losing the lines to draw inside  
If nothing is broken tell me what is my life  
We're losing time and it's not right  
What was black is now faded to white

I heard the sound of a voice that shouted loud  
I heard the sound of a voice that claimed they'd help  
Follow me follow me  
They'll take it all and play your ignorance  
Follow me follow me  
They took it all they prey on innocence

I tried to run I tried to hide  
I've been dealt this hand despite all the things that I've done  
I tried to run and hide I stayed up all night  
I've been dealt this hand despite all the things that I've done  
Losing the lines to draw inside  
If nothing is broken tell me what is my life  
We're losing time and it's not right  
What was black is now faded to white

Follow me
