

# Every Night and Every Day

Cheap Trick

Every night I can play it  
Every day I can say it  
Oh, if I cry I won't delay it  
Every night and every day

I guess I'm living for the moment  
I guess you're loving for today  
Yeah, here is where we're going  
Or are we going to stay?  
Oh, really need you more than want you  
But I still want you to stay

Every night I can play it  
Every day I can say it  
Oh, if I cry I won't delay it  
Every night and every day

Is your today really taking?  
My today is really breaking  
Is that my heart that keeps on aching  
Or will it fade away?  
Oh, will I see you again tomorrow  
Every night and every day

What if we leave our past  
Hoping these lonely nights won't last?  
Tired of the same old lies  
In the key of life

I could be waiting for an hour  
I could be waiting half a day  
I really need you more than want you  
But you really know that anyway  
Some days I love you more than others, yeah  
Some others I just want a day??

Every night I can play it  
Every day I can say it  
Oh, if I cry I won't delay it  
Every night and every day

Is your today really taking?  
My today is really breaking  
Is that my heart that keeps on aching  
Or will it fade away?  
Oh, will I see you again tomorrow  
Every night and every day

What if we leave our past  
Hoping these lonely nights won't last?  
Tired of the same old lies  
In the key of life  
In the key of life  
In the key of life  
In the key of life
