

## On the Radio

Cheap Trick

It's on the radio, I love the music on the radio  
It's what they're playin', when the radio's on  
And you and me get crazy  
It's on the radio, I love the music on the radio  
It's what they're playin', when the radio's on  
And you and me get crazy

Hey Mister on the radio, please play my favorite song  
The one where she didn't go away  
Hey Mister on the radio, you're really my best friend  
Please play my favorite song for me

It's on the radio, I love the music on the radio  
It's what they're playin', when the radio's on  
And you and me get crazy  
When the radio's on, yeah, you and me get crazy

Hey Mister on the radio, you're with me every day  
And late at night I turn you on  
Hey Mister on the radio, you're really my best friend  
Please play my favorite song for me

All of the rock and roll DJ's, got their fingers on the world  
'Cause they play the songs that make you and me feel so good

Turn up your radios and hear the music on the radio  
This song is playin', when the radio's on  
And you and me get crazy  
Turn up your radios and hear the music on the radio  
This song is playin', when the radio's on  
And you and me get crazy

When the radio's on and you and me get crazy  
When the radio's on, yeah, you and me get crazy  
When the radio's on, yeah, yeah, you and me get crazy  
Crazy, crazy, crazy

One minute, the back side of midnight, it's me Captain Gonzo  
Ready to roll hot wax anything you want to hear all night  
It's a balmy 73 degrees in Fog City  
71 in the Valley, 80 in Santa Cruz  
But remember, if you snooze you lose  
I'm gonna hang with you, I'll crank it on the girls

So let me know what you want to hear  
Phone lines are open now, you say it  
You know I'm gonna play it and be ready to win  
When I tell you to call in and whatever you do  
Remember the phrase that pays, puts your brain on vacation  
And let your toes take over, keep your pedal to the metal  
I'll be back in sixty seconds, in the meantime go with it  
Go for it, go nuts, go completely wild
