

Through the Night

Cheap Trick

You don't have to hide
All the things you say or feel inside
I can always tell that love is alive
When I look in your eyes
With just one kiss you see the ways of love

Through the night, through the night, through the night
I'll help you make it feel alright
Through the night, through the night
Let me help you make it through the night

Time is on our side
Never had to wait for reasons why
Two can play this game better than one
Alone in the night
Oh, and you could see a world of love

Through the night, through the night, through the night
I'll help you make it feel alright
Through the night, through the night
Let me help you make it through the night

Don't blow it away
'Coz you can't deny the love inside
Oh baby, don't be afraid

Been said a million times before
Gonna say it once again
You will see a world of love through the night

Through the night, through the night
Let me help you make it through the night

Through the night, through the night, through the night
I'll help you make it feel alright
Through the night, through the night
Let me help you make it through the night

Through the night, through the night, through the night
I'll help you make it through the night
Through the night, through the night
Let me help you make it through the night
