

Song For Her

Chemical Vocation

Awkward feelings make me come up
With questions about the truth of all there is.
You're the source for all i feel today,
And i will never doubt.

Your way to be the one you are,
Affect me more then shining stars.
You take me to the greener grass,
I hope this love forever last.

I think i'll freeze this moment
Cuz i want this photograph to last forever.
Standing for the things i feel,
The things i do no matter what they say.
Who thought that we would be a part of something so special.

Eight months past so quick,
I remember telling my friends
I'll never get the chance.
But now i know it all,
She will be playing me fair.
And never take second chances,
She's always there.

I think i'll freeze this moment
Cuz i want this photograph to last forever.
Standing for the things i feel,
The things i do no matter what they say.
Who thought that we would be a part of something so special.
Awkward feelings make me come up
With questions about the truth of all there is.
You're the source for all i feel today,
And i will never doubt.

Your way to be the one you are,
Affect me more then shining stars.
You take me to the greener grass,
I hope this love forever last.
