

The Good Things

Cherry Poppin' Daddies

I watched you pack
I could feel my will go slack
I laid my body down for the vultures on that spring
Its funny what I miss
About the years we shared our kiss
The smallest pebbles in the stream
I remember the way that she looked
when she left that night
all covered in roses
it must've been roses
Please let me remember
I wanna remember
only the good things
only the good things
Im out on our land
Watchin the bees go plant to plant
and runnin around with my little hound
while the floating falcon screams
One year has gone
Your garden dirt has gotten soft and warm
And my every shovel fills like cream
I remember the way that she looked
when she left that night
all covered in roses
it must've been roses
Please let me remember
I wanna remember
only the good things
only the good things
Its only the good things
That say who we are
Its only the good things
that reach for a star
Its only the good things
So come as you are
its only the good things that shine
Whether or whether not
