

Hummingbird

Cheryl Cole

I'm getting dizzy here
Running in circles
Holding onto your coat tails
Cupids been busy
Shooting his arrows
While I follow the love trail
They led me straight to you
And all I had to do
Was look in my tracks
And double back
I turn around and look what I found

All this time I've been running in circles
You were right behind
I guess I could've met you in the middle
How come it never crossed my mind?

Humming birds around my head
Humming birds around my head
I ran into your arms
Wound up dizzy instead
Now I got butterflies, blue jays
Pretty things in the air out there
Ever since I found this, been
Humming birds around my head

Hes so tricky yeah
Coming full circle
I always knew how to get there
And he was so picky that
He took his eye off the sparrow
Flew out after the nightingale
And heaven for a while
He took them fast and lost his style (?)
Circled his tracks
Double back
Turned around and look what you found

All this time I've been running in circles
You've been right behind
I guess I could've met you in the middle
How come it never crossed my mind

Humming birds around my head
Humming birds around my head
I ran into your arms
Wound up dizzy instead
Now I got butterflies, blue jays
Pretty things in the air out there
Ever since I found this, been
Humming birds around my head

I got tiny little bee stings on my heart
Where the love blooms
Honey can I only be with you?
Sitting underneath the shade
Tree in the park where I first met you

Funny how the light can change your view

Oh

Humming birds around my head
Humming birds around my head
I ran into your arms
Wound up dizzy instead
Now I got butterflies, blue jays
Pretty things in the air out there
Ever since I found this, been
Humming birds around my head

Humming birds
Humming birds
I ran into your arms
So dizzy instead
Butterflies, blue jays
Oh in the air out there
Ever since I felt
There's been
Humming birds around my head
