## Hummingbird

I'm getting dizzy here Running in circles Holding onto your coat tails Cupids been busy Shooting his arrows While I follow the love trail They led me straight to you And all I had to do Was look in my tracks And double back I turn around and look what I found

All this time I've been running in circles You were right behind I guess I could've met you in the middle How come it never crossed my mind?

Humming birds around my head Humming birds around my head I ran into your arms Wound up dizzy instead Now I got butterflies, blue jays Pretty things in the air out there Ever since I found this, been Humming birds around my head

Hes so tricky yeah Coming full circle I always knew how to get there And he was so picky that He took his eye off the sparrow Flew out after the nightingale And heaven for a while He took them fast and lost his style (?) Circled his tracks Double back Turned around and look what you found

All this time I've been running in circles You've been right behind I guess I could've met you in the middle How come it never crossed my mind

Humming birds around my head Humming birds around my head I ran into your arms Wound up dizzy instead Now I got butterflies, blue jays Pretty things in the air out there Ever since I found this, been Humming birds around my head

I got tiny little bee stings on my heart Where the love blooms Honey can I only be with you? Sitting underneath the shade Tree in the park where I first met you

## **Cheryl Cole**

Funny how the light can change your view

Oh

Humming birds around my head Humming birds around my head I ran into your arms Wound up dizzy instead Now I got butterflies, blue jays Pretty things in the air out there Ever since I found this, been Humming birds around my head

Humming birds Humming birds I ran into your arms So dizzy instead Butterflies, blue jays Oh in the air out there Ever since I felt There's been Humming birds around my head
