

# Nothing Serious

Chesney Hawkes

Oh, oh, oh  
Strange that it all meant so much less to you  
Those beautiful moments we shared  
Sad to think that every time you held me close  
Deep inside you never cared

I believed every single word you said to me  
I believed every promise in your kiss  
I know there were lies you told me  
But they're lies that I'm gonna miss

Chorus:  
Loves nothing special or mysterious  
Just breaks your heart apart  
Loves nothing special or mysterious  
Makes burning teardrops start  
And breaks your heart apart

Friends say that one day I'll get over you  
Oh but they don't feel the pain  
Cause it's me that walks the street at night  
I hope to meet you in the rain  
I pray one day you'll come back to me  
That goodbye was not for real  
Maybe you'll change your mind  
Put an end to this misery I feel

Loves nothing special or mysterious  
Just breaks you every day  
Loves nothing special or mysterious  
It hurts in every way  
And burns you every day

It hurts when I hear records we used to play,  
Think of the good times we had  
At night whenever I think of you  
The pain it drives me mad

Try hard to hate you for the things you've done  
But those kind of feelings never last  
My future's empty for the present now  
My heart's still living in the past
