

# Hunter Eats Hunter

Chevelle

I grabbed a flashlight  
Just like I always do  
A damp sorta night  
And now I'm telling you  
Well I saw a pair of eyes  
And I'm sure they saw me too  
Well don't never never run  
Hell yes I'm going to

How long, should I feel like bait now?  
Wide open, careful where the mind goes  
Moonlight, a superstitious glow  
If it's my time, well I'm going out alone

You ever try to hold your breath?  
Well here's a tip don't follow through  
You feared that nightmares never end  
And now it seems it's coming true  
No one should see what I could see  
It's up to you with weakened knees  
That little creep just grabbed my arm  
It's gonna be the longest night

How long, should I feel like bait now?  
Wide open, careful where the mind goes  
Moonlight, a superstitious glow  
If it's my time, well I'm going out alone

Night, you're a friend of mine, another family  
Better not divide, any, armed, with its beastly doom  
I'll beat this jackal down, this interference ends  
I'll send it back beyond

When hunter meets hunter, this hunter eats hunter (2x)

How long, should I feel like bait now?  
Wide open, careful where the mind goes  
Moonlight, a superstitious glow  
If it's my time, well I'm going out alone

If it's my time  
Well I'm going out alone (3x)
