Under the Knife

Are you drunk or has your ego grown and Swallowed you whole No wonder I would rather be under the knife Commandeer most accused Just want to be tossed aside to Know when to fight

Who has the life to spend on this When you're the last to know I started 1976 And that wasn't fast enough

I planned a journey 'round your psycho fury Go ahead call me a nervous Life just owes ya something

Give me the knife

Who has the life to spend on this When you're the last to know I started 1976 And that wasn't fast enough

It's in the back of the mind In the back of the mind It's in the back of the mind It's in the back of the mind

Well who has the knife to settle this When you're the last to know I started 1976 And that wasn't fast enough Well Who has the life to spend on this When you're the last to know I started 1976 And that wasn't fast enough

It's in the back of the mind In the back of the mind It's in the back of the mind It's in the back of the mind Chevelle
